### Record Participant List

Provide an XLS file, or attach a separate page. Must include name(s) of participant(s), Country (if available), and date of expiration.

### Certification

One ISA Discipline member is required to certify a world record once all World Record Application paperwork is submitted to the ISA.

One ISA (or other recognized World Record Organization) Judge must be on-site. Discipline-specific records require Judges rated in that discipline. FAA-rated pilots must provide exit altitude for large formation records.

A plan of the jump and a list of participants must be submitted to the observing judge before the jump; the formation must be completed as planned.

We, the undersigned, certify the claimed record performance. The attempt was made in accordance with the rules of the ISA. A jump plan and video/photographic evidence of the jump, as required, have been provided and verified.
